About CERes journal

Central European Researchers Journal (CERes journal) cover different areas and problems of engineering. The main topics of the journal concern modern information technologies, computer systems, critical infrastructures, etc. their modelling, analysis, estimation, performance, reliability. The principal goal of CERes journal is the support of young researchers, their investigation by the proposition of stable platform for publications and presentations with active distribution. Therefore CERes journal is on-line journal with free access. Publications of PhD students, post-doctoral students and young researchers will be dominantly in the journal. Review articles and methodological presentation of well-known researches and engineers will be presented too.

Topics of interest includes:

- Digital signal processing
- Communication and control systems and networks
- Hardware and software solutions
- Innovative eHealth, Applications and Products
- Electronic Health Records and Medical Databases
- Medical Image Analysis and Biomedical Visualization
- Computer-Aided Diagnosis
- Telemedicine, Telehealth and Remote Monitoring
- Reliability analysis and risk estimation
- Testing and fault-tolerant systems
- Accident and incident investigation
- Human factor
- Risk and hazard analysis
- Software reliability
- Computational Intelligence
- Data mining and Knowledge discovery
- Education, e-learning

Manuscript requirements

Manuscript optimum length is 12 pages including figures, tables and references.

Language manuscript must be written in English and must be prepared in journal template (Word or Latex)

Supported by project

An international peer-reviewed scientific journal published since 2015 with support of the project **Centers of Excellence for young REsearchers (CERES) - 544137-TEMPUS-1-2013-1-SK-TEMPUS-JPHS**. The journal is platform for publications presentation of result in work of students, PhD students and young researchers.
